

Summer is here!!!s! The kids are out of school. The

shad flies are kinda sorta dissipating. Time to get outside and enjoy the great outdoors.

Although summer is my busy season at work, I'm planning on putting a portable kit together to, hopefully, do some Summit on the Air and/or some Parks on the Air activations. Just enough to fit into a backpack with some snacks and water. Gotta hydrate! No car batteries or schlepping heavy weights. Maybe a roll up solar panel with a mini car battery booster as a power supply? I'll be experimenting that's for sure with different power sources and portable antennas.

For those who want more information:

Summits on the Air: <https://www.sota.org.uk>

Parks on the Air: <https://parksontheair.com>

Islands on the Air: <https://www.iota-world.org/>

Lighthouses on the Air: <https://arlhs.com/>

More Lighthouses: <https://www.wlota.com/>

Lighthouses Event: <https://illw.net/>

And here is something new; Boats on the Air: <https://www.boatsontheair.com/howitworks>

Ahhhhh, the hazy, lazy days of Summer: enjoy and stay safe.
